

**1**

Go to [https://www.engeniustech.com/engeniustech.com/overview-cloud-networking](https://www.engeniustech.com/engeniustech.com/engeniustech.com/engeniustech.com/overview-cloud-networking)

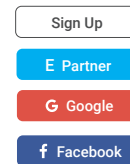

**2**

Click **Login** (upper right corner)

**3**

Choose Account setup method

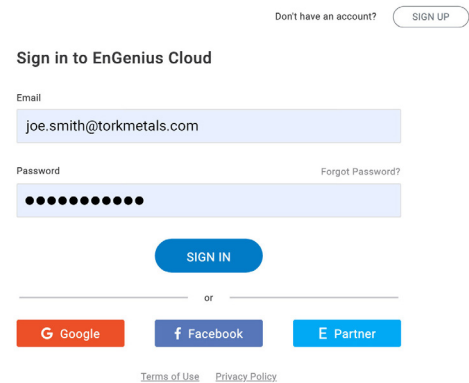

- a. Sign Up
- b. E Partner (EnGenius Partner)
- c. Google
- d. Facebook

**Note:** Once account setup is submitted you will receive an email confirmation. You will have to confirm before signing into your account.

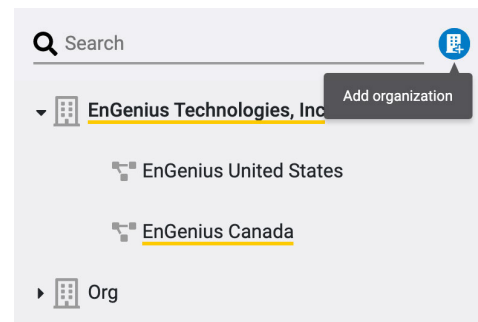

**4**

Login into your EnGenius Cloud Account.

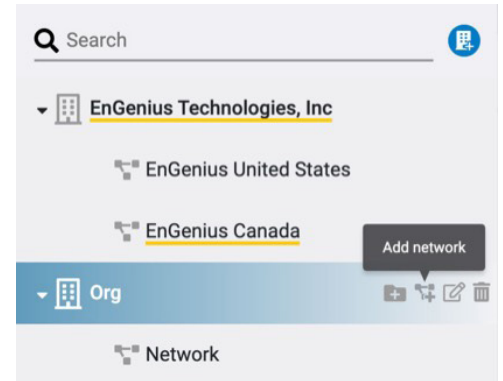

**5**

☰ Add an "Organization" from the hamburger menu.

# 6

Add a "Network" within your "Organization".

**Note:** After "Organization" and "Network" are created configure "SSID's" and "Radio Settings" .

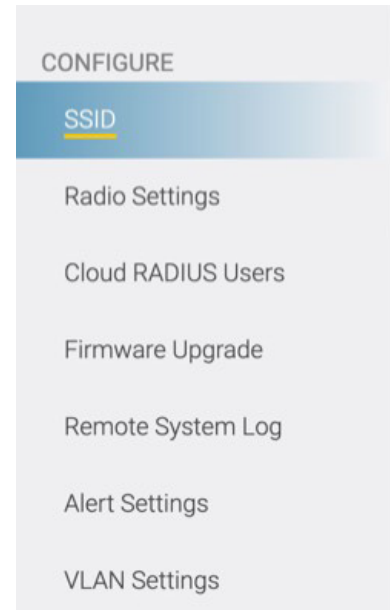

# 7

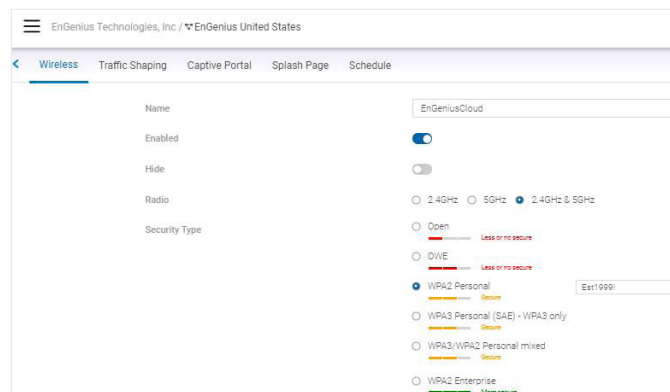

Select the "Organization" and "Network" that was created, and then configure "SSID".

Choose "CONFIGURE" from the sidebar menu to add a SSID.

- Select the "SSID" menu to add and configure a SSID.
- Add SSID "+ Add SSID"
- Create SSID name via "Wireless" menu
- Select security under "Security Type"
- Click "Apply" to save changes

**Note:** Any access point that is assigned to this network will take on the configurations of this SSID.

**Note:** Once the “SSID” is created and configured, Radio Settings can be configured.

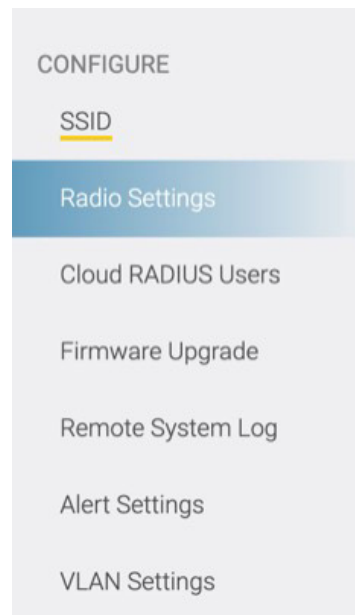

8

Choose “**CONFIGURE**” from the sidebar menu to configure radio settings. Select the “**Radio Settings**” menu to configure radio settings.

Use best practices when configuring radio settings.

**Note:** Congratulations, initial cloud setup is complete. Devices, cloud access points and switches can be registered.

9

There are two methods to register cloud devices; Cloud GUI under the ORGANIZATION icon or via the EnGenius Cloud App. This guide covers the app method.

Download **EnGenius Cloud App**.

EnGenius  
Cloud App.

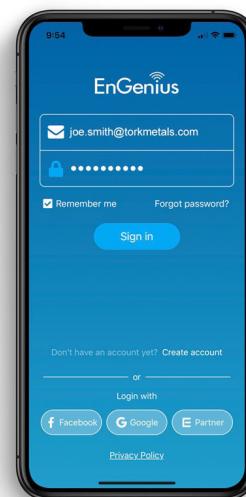

Organization  
Icon

10

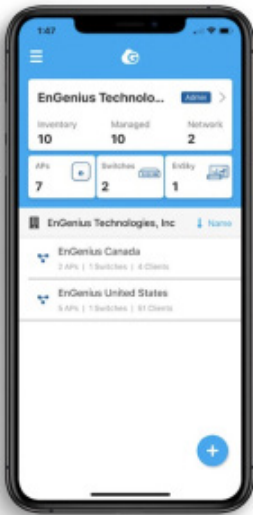

Login into your EnGenius Cloud Account via the **EnGenius Cloud App**.

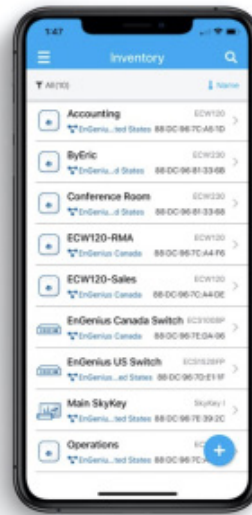

# 11

Register your EnGenius Cloud switches and access points into your new “Organization” and “Network” via the EnGenius App cloud.

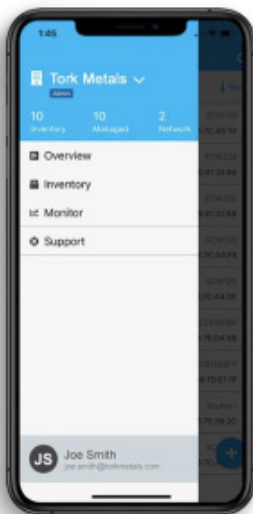

a. Select your created “Organization” via drop-down menu.

b. Select “+” button at the bottom.

c. Select “Inventory” via hamburger menu.

d. Scan QR code on the back of your EnGenius Cloud device.

e. Add Cloud device into your created “Network”.
